

**North East Trees**  
Bringing Nature Back

## **Sennett Creek Greenway Planning and Design Project**

Santa Monica Mountains Conservancy and North East Trees have begun a planning process for a greenway project to be located at the confluence of Sennett Creek and the Los Angeles River, in the City of Los Angeles.

Sennett Creek is a tributary to the Los Angeles River and has a watershed approximately 704 acres in size which includes the north slope of Griffith Park, Forest Lawn and Mount Sinai Memorial Parks. The study area is approximately 16 acres. The main project area lies between Forest Lawn Drive and the Los Angeles River. The site is utility corridor and is dominated by electrical towers and overhead power lines the natural habitat is severely degraded.

The Sennett Creek Greenway was identified as an opportunity area in the Revitalization Plan developed by the Upper Los Angeles River and Tributaries (ULART) Working Group. The project is located within The Rim of the Valley Trail Corridor, which is a network of parks and trails surrounding the San Fernando Valley.

Greenway projects can improve climate resiliency and protect the Los Angeles River Watershed. The Sennett Creek Greenway project has the potential to restore native habitat, improve water quality and provide recreational trail connections.

For twenty-five years North East Trees and the Santa Monica Mountains Conservancy have worked together to develop greenways along the Los Angeles River with recreational trails, benches, artistic interpretive displays and California native plants. The Sennett Creek Greenway project will transform a neglected site into a new green space with natural habitat for all living things to enjoy.

Stakeholder input is being solicited. A stakeholder can be any person with an interest or concern including neighbors, elected representatives and park advocates.

# UPPER LOS ANGELES RIVER AND TRIBUTARIES REVITALIZATION PLAN

## Opportunity Area Summary

Project: Sennett Creek; OA\_891

Footprint (acres or feet):	16.7 acres
Tributary:	Los Angeles River Main Stem
Public ownership (%):	100
Project suggested by:	Existing and Planned Projects
Primary Typology:	Parks and Ecological Connections
Secondary Typology:	Channel Right of Way

Cities (%): Los Angeles: 100
